PROFESSIONAL SUMMARY

Results-driven Full Stack Web Developer specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js). Proven ability to build modern, responsive, and scalable web applications from end-to-end. Experienced in designing robust backend architectures, integrating complex RESTful APIs, and developing intuitive, user-centric frontend interfaces. Adept at leveraging AI integrations and real-time database management to solve real-world problems.

TECHNICAL SKILLS

- Frontend Technologies: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- Backend Technologies: Node.js, Express.js
- Database Management: MongoDB, IndexedDB
- API & Integrations: RESTful APIs, JWT Authentication, Pexels API, Web Audio API
- Other Tools & Frameworks: Flutter, Dart, Git, GitHub, VS Code
- Core Competencies: Full Stack Development, Secure Authentication, State Management, UI/UX Design, AI Verification Systems

PROFESSIONAL PROJECTS

Homedify – AI Powered Marketplace Platform

React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT

- Architected and developed a full-stack marketplace platform connecting buyers and sellers with modern web architecture.
- Integrated an AI-based verification system to ensure maximum security and authenticity for user profiles and listings.
- Implemented secure JWT authentication and role-based user dashboards to manage diverse access levels seamlessly.
- Developed a robust Escrow Payment Integration to facilitate secure and trustworthy financial transactions.
- Built real-time chat support and dynamic search & filtering capabilities to enhance the user experience and platform usability.

WallNest

Flutter, Dart, Pexels API, Provider

- Engineered a high-performance mobile wallpaper application powered by the Pexels API.
- Implemented infinite scrolling and dynamic category filtering, allowing users to effortlessly discover content.
- Integrated robust state management using Provider to handle favorites and high-resolution image downloads seamlessly.
- Optimized the application for performance, ensuring instant delivery of high-resolution images across diverse devices.

Premium Naat Player

HTML, CSS, JavaScript, IndexedDB, Web Audio API

- Developed a multi-user audio streaming platform featuring advanced audio controls and custom audio visualizers.
- Engineered an offline playback system utilizing IndexedDB storage, ensuring seamless listening experiences without internet connectivity.
- Built a comprehensive user authentication system and playlist management features to personalize the user journey.

SERVICES & EXPERTISE

- Full Stack Web Development: Developing complete web applications using the MERN stack. Handling everything from frontend interfaces to backend architecture and database integration.
- Frontend Development: Creating modern, responsive, and interactive user interfaces utilizing React.js and Tailwind CSS across desktop, tablet, and mobile devices.
- Backend & API Development: Designing secure, scalable RESTful APIs and backend logic with Node.js and Express.js, ensuring efficient data flow and robust authentication.
